

To use this application please follow the steps below:

1. Go to the main folder in your console
2. Open the app on your console by running the commands:
 - npm install
 - node app.js
3. On your browser, go to <http://localhost:3000>, the homepage will appear
4. Login with the provider of your choice by using your own social account
5. You can then go through the pages depending on which provider you chose

Version of Node js used: nodejs 8

Databases used:

1) MySQL database provided

```
host: 'eu-cdbr-west-02.cleardb.net',  
user: 'b480b55ee49405',  
password: 'd1615d31',  
database: 'heroku_1e1cef8e1bea7f7'
```

2) MongoDB database

```
dbURL: 'mongodb://lina:lina92@ds131743.mlab.com:31743/pd-ehealth-app'
```

This link provides a youtube video attesting that the application works correctly:
